

E-M-M-A components + our experience = your tailor-made solution.

E-M-M-A – name says it all:
Economical – Modular – Multifunctional – Automation

E-M-M-A
carries anything, from crankshafts to boxes of tea,
from detergents to cheese boxes.

E-M-M-A
conveys things upwards and downwards,
from the left and the right, reliably,
quickly and energy efficiently.

E-M-M-A conveyor systems & solutions

When it comes to your solution ...
when you want to reach your target
fast and cost-effectively ...

E-M-M-A realises your wishes, practically!

We build your ideas.

Conveyor systems tailor made
Standardized components for individual solutions

You have

- to transport something within your production?
- a facility that you would like perhaps to expand, modify or optimise?
- a preference for a practically-minded partner?

You want

- to talk to an experienced partner?
- your wishes to be understood?
- a cost-effective and practical solution?

E-M-M-A

- is the modular system for individual solutions
- is a system with which you can locally use international experience
- conforms to the market standard and meets your requirements

Cooperation with **E-M-M-A** is simple:

Step 1

Contact us or our partner:

www.e-m-m-a.eu

Step 2

Make an appointment

Step 3

Experienced consultants analyse your project definition with you. Decades of activity in the sector and a rich wealth of experience lead to creative and above all practical solutions.

Step 4

Your **E-M-M-A** partner will thoroughly discuss your conceptual formulation in-house, the initial ideas will be refined and also completely new approaches will be developed.

Step 5

Your individual and tailor-made **E-M-M-A** solution will be presented by your consultant. It will be discussed with you and developed further. Good collaboration and interactive development lead to future-proof solutions.

Step 6

The concept complies with your wishes; we are pleased to make it a reality.

The **E-M-M-A** system tested components and our comprehensive stock inventory are a reliable basis for rapid project development and short realisation times.
