

**E-M-M-A**  
**Economical-Modular-Multifunctional-Automation**

An example of the technical details:

Pallet size (width/length): 150/250mm

Weight per pallet: 10 kg

Positioning precision: +/- 0.1 mm

Conveying speed: 5 m/min

For technical questions about the implementation of your workpiece carrier system, please contact:

**E-M-M-A GmbH**

Dr. Koch-Gasse 3, 2332 Hennersdorf bei Wien, Austria

E-M-M-A: deployable in different environments.  
 E-M-M-A: combinable with existing equipments.  
 E-M-M-A: a safe investment!

### E-M-M-A workpiece carriers

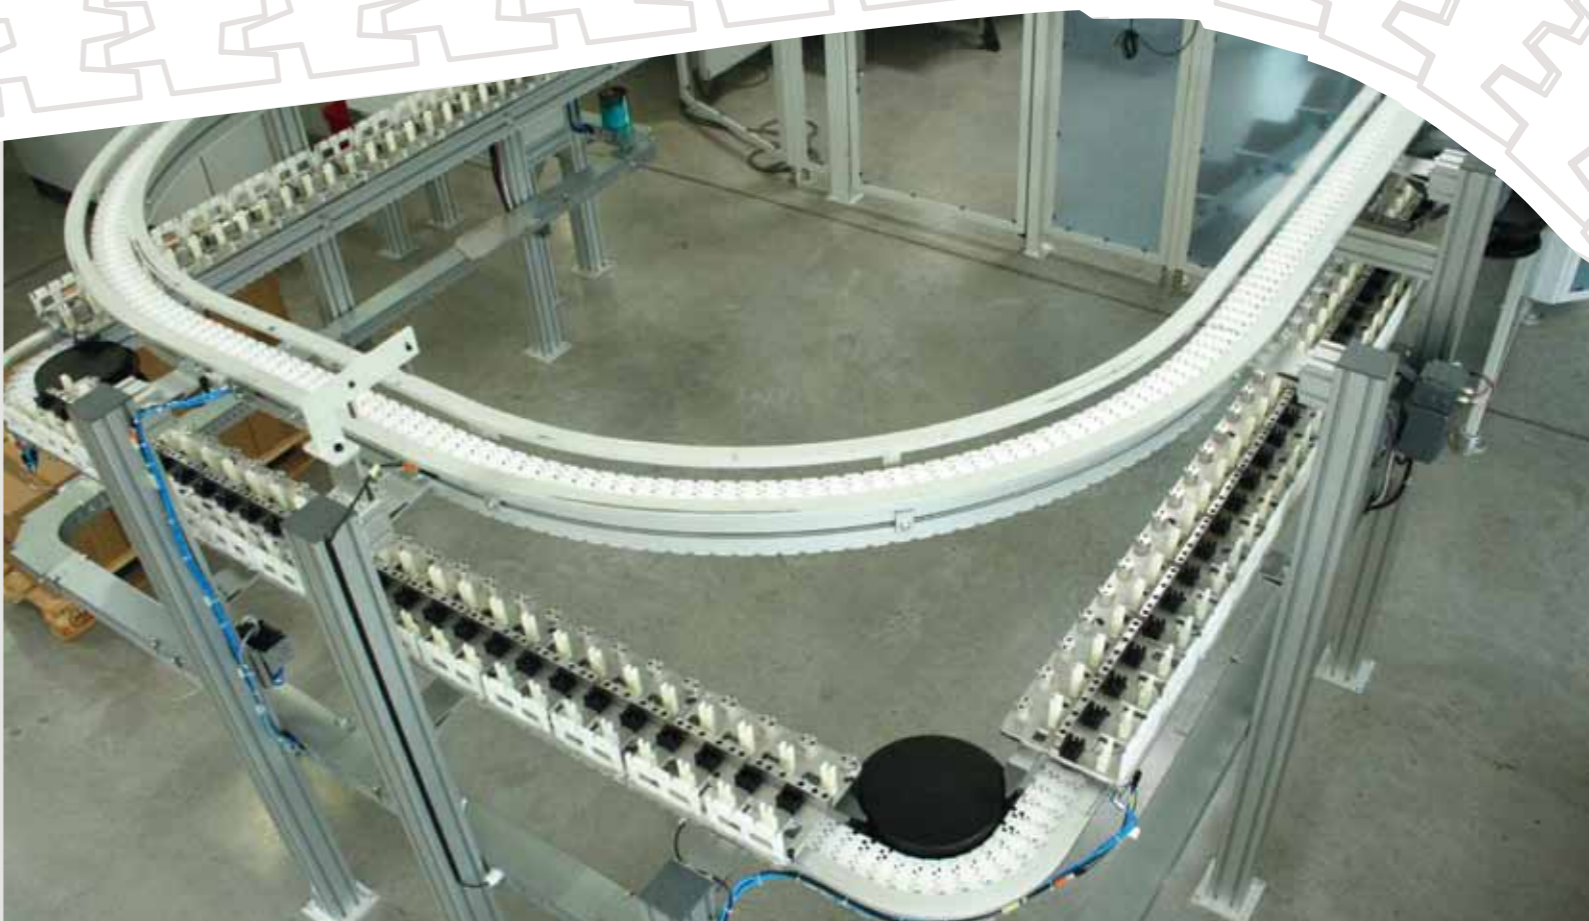

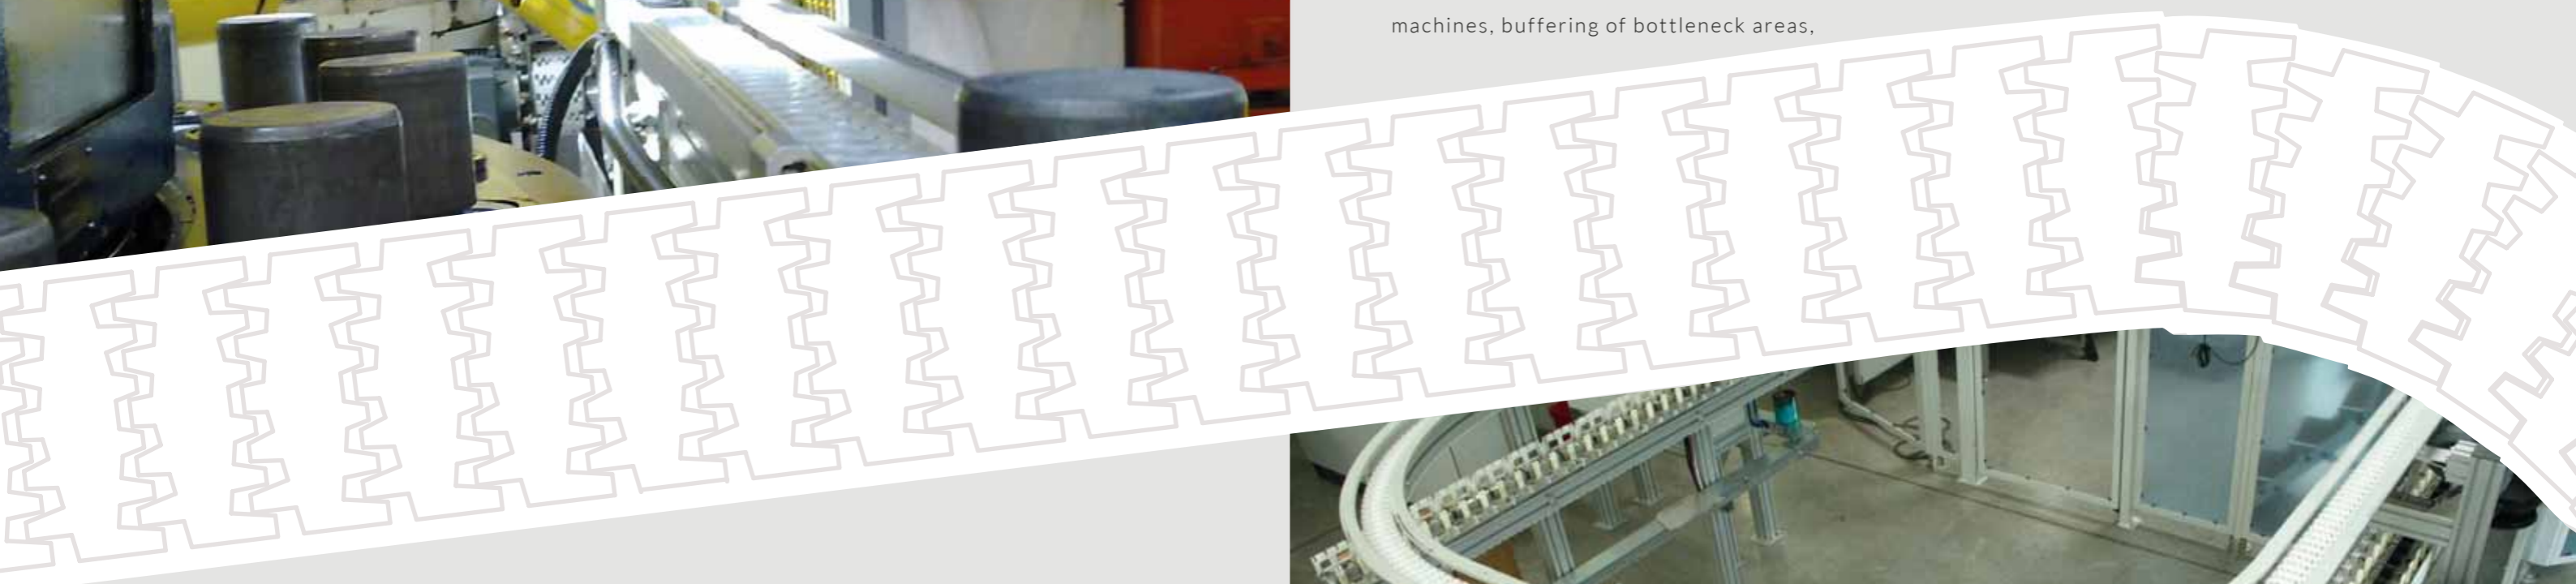

E-M-M-A is a tested and versatile product that, together with the experience of the E-M-M-A team, will individually solve your in-house transportation tasks!

E-M-M-A workpiece carriers transport your product particularly gently, because it is protected all round from contact.

The functions cycle decoupling between the machines, buffering of bottleneck areas,

exact positioning for automated processes are simply and safely realised.

The upperside of the E-M-M-A workpiece carrier can be individually adjusted to your workpiece, the underside of the E-M-M-A workpiece carrier is standardised for transport, stopping and positioning.

#### Areas of application:

- Parts supply to robots
- Parts supply to manually operated machines
- Manual or automated assembly systems
- Flexible machine chains
- Increase in the autonomy periods of the machines
- Gentle product transport
- Transport of parts with awkward shapes
- Cycle decoupling in finishing processes

#### Range of parts:

CDs, batteries, components for lights, drills, electronic components, electric tools, body components, cable sets, pistons, crankshafts, speakers for mobile telephones, furniture fittings, relay parts, spots lights, grinding discs, sintered parts, valves, gear wheels, cylinders and

.... also your products!
